	Translation of Number 1
B. P. PUGACHOV	1 Some applications of the spectral expansion of matrices
S. F. GILYAZOV	8 Regularizing algorithms based on the conjugate-gradient method
M. V. AREF'YEVA	13 Optimal and quasi-optimal regularizing algorithms for solving stochastic integral equations of the convolution type
V. S. FILINOV	21 Construction of a Monte-Carlo method for calculating Feynman integrals
R. MÄRZ	30 On correctness and numerical treatment of boundary value problems in differential-algebraic equations
V. T. IVANOV and G. N. NEKHAYEVA	40 Numerical solution of external boundary value problems for elliptic equations
A. V. KRYLOV	44 The asymptotic integration of weakly non-linear systems with partial derivatives
A. V. GONCHARSKII and V. V. STEPANOV	50 Inverse problems of coherent optics. Focussing in a line
S. A. GABOV and B. B. ORAZOV	58 The equation
	$\frac{\partial^2}{\partial t^2}[u_{xx} - u] + u_{xx} = 0$
	and several problems associated with it
A. N. VERETENTSEV, V. YA. RUDYAK and N. N. YANENKO	65 The construction of discrete vortex models of ideal incompressible fluid flows
A. T. FEDORCHENKO	71 On vortex outflow through the permeable boundary of the computational domain of non-stationary subsonic flow
	Short Communications
A. A. KRONBERG	80 Random walk over spheres algorithms
V. A. BEREZNYEV, V. G. KARMANOV and A. A. TRET'YAKOV	84 The stabilizing properties of the gradient method
V. K. TOLSTYKH	86 Application of the gradient method to problems of optimizing systems with distributed parameters
M. V. IVANOV	88 A difference solution of the one-particle Schrödinger equation with axisymmetric potential
A. V. DRORAK and D. A. TESELKIN	91 Numerical solution of two-dimensional problems of the pulse motion of floating bodies
A. S. ANTIPIN	96 Extrapolation methods of computing the saddle point of a Lagrange function and application to problems with block-separable structure
V. N. SOLOV'EV	97 Sufficient conditions for global minimum in partially convex constrained problems
YU. I. MOKIN	98 A method of calculating a simple layer potential
	Translation of Number 2
V. N. NEFEDOV	99 Approximation of a set of pareto-optimal solutions
V. G. ZHADAN	108 A method for the parametric representation of objective functions in conditional multicriterial optimization.
A. A. ZHIGLYAVSKII	116 Optimal weighted Monte-Carlo methods
M. V. FEDORYUK	121 The WKB-method for a non-linear equation of the second order

O. E. BURYAK	129	The Cauchy problem for the linearized Landau equation
I. G. DYAD'KIN	134	On efficient algorithms for the modelling of neutron and γ -quanta transport events by the Monte-Carlo method
V. E. TROSHCHIEV and V. A. SHUMILIN	141	A difference scheme for solving the two-dimensional transport equation on irregular tetragonal nets
A. S. BARASHKOV and G. I. BARASHKOVA	149	Determination of the coefficient of Helmholtz's equation from the boundary values of the solution
D. G. PERADZE	157	A difference scheme for a non-linear problem on the bending of a plate
N. N. KANAYEVA and O. A. SHCHERBINA	162	On a modified local algorithm for problems of discrete programming
YU. A. ZUEV	170	A probability model of a committee of classifiers
O. M. MAKAROV		Short Communications
N. I. KOZLOV and L. N. SOKOLOVA	179	An algorithm for multiplying 3×3 matrices
G. N. KURAYEV	180	The integral form of the solution of a problem on radio pulse propagation in a non-conducting medium
M. P. BELYANIN	184	On the solvability of the problem of stationary heat convection with radiant convective heat exchange on the boundary
A. L. KOPA-OVDIYENKO	188	On the asymptotic solution of a model of a $(p-n)$ junction
	193	On the use of Lagrange coordinates for modelling light beams with strong spatial deformation

VOL. 26, NO. 2

CONTENTS

1986

A. V. LOTOV		Translation of Number 3
A. S. NEMIROVSKII	1	An estimate of the effect of rounding errors on the accuracy of the elimination of variables in sets of linear inequalities
A. V. SERGEYEV	7	The regularizing properties of the adjoint gradient method in ill-posed problems
V. K. DZJADYK	17	A recursive algorithm for Padé-Hermite approximations
L. F. YUKHNO	23	An approximation-iterative method of approximating the solution of Cauchy's problem for ordinary differential equations using polynomials
O. P. CHUYAN	32	A method of accelerating the iteration processes of solving difference equations
V. A. GALAKTIONOV, S. P. KURDYUMOV, S. A. POSASHKOV and A. A. SAMARSKII	37	An optimal single-step algorithm for maximizing doubly differentiable functions
A. I. ZUEV and V. G. NIKOLAYEV	48	A non-linear elliptic problem with a complex spectrum of solutions
S. A. ABRAMOV, E. A. KAZ'MINA and V. A. KUKLYAEVA	54	Iterational methods of solving equations of gas dynamics
V. A. DAUGAVET and A. V. LAZAREV	60	Variants of semantics of inaccurate data and the approximate performance of programs
V. D. SKARIN	67	Development of Dantzig's method in quadratic programming
V. A. ZHEVNEROV and I. D. RODIONOV	73	An approach to the analysis of improper problems of linear programming
M. A. IVANOV	79	Optimal design of information systems by the parameter evolution method
		Short Communications
	84	An economic algorithm for solving systems of difference equations with a block-tridiagonal matrix

N. N. KALITKIN and I. V. RITUS	87	The smooth approximation of Fermi-Dirac functions
V. P. KUTOV and V. V. SMELOV	90	Finite approximations of the spherical harmonic method with different orders in spatial subregions
V. I. ABRAMOV, A. P. KARTASHEV and A. S. ROSHAL'	93	A method for the non-linear analysis of the sensitivity of mathematical models
		Translation of Number 4
V. I. MELESHKO	98	Regularized non-orthogonal factorizations and pseudoinversions of perturbed matrices
A. M. LEVIN	108	Calculation of the degree of incompatibility of operator equations of the first kind
V. A. SROCHKO and R. G. KHAMIDULIN	113	The method of successive approximations in optimal control problems with boundary conditions
A. A. BELOLIPETSKII and A. YU. RYABOV	122	Asymptotic estimates of solutions of the problem of the optimal speed of response near the points of discontinuity of an isochronous surface
P. A. DOROFEYEV	131	A scheme of iterative minimization methods
YU. R. ROMANOVSKII	137	The asymptotic properties of analytical solutions of the non-linear Boltzmann equation
A. E. POYEDINCHUK, V. P. SHESTOPALOV and N. P. YASHINA	142	Spectral theory of a coaxial-waveguide resonator
G. V. MOLADZE and D. V. POTSKHISHVILI	148	Convergence of difference schemes of gas dynamics in quasi-Lagrange variables
I. N. MOLCHANOV and V. E. RYABTSEV	155	Direct methods of solving systems of linear algebraic equations with parallel organization of the computations
S. I. MAZURIK and V. P. SHAPEYEV	162	Use of computer symbolic transformations for studying the approximation and stability of difference schemes
A. V. BABAKOV, O. S. BATSUKOV, O. M. BELOTSERKOVSKII and L. N. STOLYAROV	171	On the possibility of attaining high productivity in the solution of problems of mathematical physics using vector pipeline digital computers
		Short Communications
YU. A. POLOVKO	180	A numerical method of solving non-linear two-point boundary value problems
V. S. ANTUFEEV	183	Solution of integral equations of the second kind with a stochastic kernel using the Monte-Carlo method
E. V. AKHMATSKAYA and L. A. POZHAR	185	Calculation of transport collision integrals for a Lennard-Jones gas
V. V. NEKRUTKIN and N. E. PRIGARO	190	On the rate of convergence to the boundary of some versions of the spherical process
E. V. ZAKHAROV and I. V. SOBYANINA	194	On one-dimensional integro-differential equations for problems of diffraction by screens

		Translation of Number 5
A. S. BRATUS	1	Multiple eigenvalues in problems of optimizing the spectral properties of systems with a finite number of degrees of freedom
A. V. STARKOV	8	New estimates of the variance in the Monte Carlo method when an approximate value function is used
I. KH. SIGAL	14	Computational implementation of a combined branch and bound algorithm for the travelling-salesman problem

O. O. GALAKTIONOVA and V. A. ZLATOSTOV	20	2 π -Periodic solutions of Duffing's equation
V. A. ZABOLOTNOV	28	A method of refining averaged systems of differential equations
E. I. TIKHOMIROVA	33	The convergence of a finite-difference scheme for a non-linear evolution equation
N. V. NIKITIN	39	The use of continuous integrals to determine the eigenvalues of the Fokker-Planck equation
M. F. PEREBINOS and R. P. FEDORENKO	44	Methods of mathematical programming in problems of optimal antenna design
N. A. BLINOV, V. V. BOIKO, I. A. LEONT'EV, V. P. SINEL'NIKOV, S. S. FILIPPOV, M. I. TSATSULIN and N. V. CHEBURKIN	51	Development of overheat instability in the plasma of a high pressure space discharge
N. D. KOPACHEVSKII and A. N. TEMNOV	58	Vibrations of a stratified liquid in a basin of arbitrary shape
M. YU. SHASHKOV and I. B. SHCHENKOV	73	The use of symbolic transformations to construct and study difference schemes
V. N. KARMAZIN		Short Communications
S. A. NEKRASOV	79	The regularization of sets of linear inequalities
L. D. IVANOVICH, B. S. IOVANOVIKH and E. E. SHILI	83	A bilateral method of solving Cauchy problems
M. KH. KHAIRULLIN	87	The convergence of difference schemes for a biharmonic equation
K. S. MAMEDOV	90	The solution of converse problems of subterranean hydromechanics by Tikhonov-regularizing algorithms
Z. T. NAZARCHUK	92	The equation of the oscillations of a compressible rotating fluid and the spectral properties of the connected operator pencil
A. A. CHARAKHCH'YAN	97	Computation of a class of integrals with a logarithmic singularity
I. M. SOBOL		Letter to the Editor
A. M. VERSHIK and P. V. SPORYSHEV	98	Remark on the paper "On one decomposition scheme for the equations of gas dynamics"
S. A. VOITSEKHOVSKII, I. N. GAVRILYUK and V. S. SAZHENYUK		Translation of Number 6
A. I. GASANOV and I. E. KAPORIN	100	A multicriterial interpretation of the method of regularizing ill-posed problems
A. R. MAIKOV, A. G. SVESHNIKOV and S. A. YAKUNIN	104	An asymptotic estimate of the average number of steps of the parametric simplex method
V. I. GRYN	113	Estimates of the rate of convergence of difference schemes for variational elliptic second-order inequalities in an arbitrary domain
T. Z. MULDAŠEV and U. M. SULTANGAZIN	120	Use of the exclusion method in solving strictly elliptic systems using the finite element method
S. N. VOROB'EV, L. N. LITVITSENKO and S. L. PROSVIRNIN	130	A difference scheme for the non-stationary Maxwell equations in waveguide systems
E. I. ANDRIANKIN, V. A. ANDRUSHCHENKO and N. N. KHOLIN	139	The inverse problem of the linear theory of radiation transfer
V. M. KRIVTSOV	151	The method of spherical harmonics for solving the radiation transfer problem in a plane-parallel atmosphere
	159	Wave diffraction by a periodic structure consisting of inclined metal tapes
	167	Algorithm for solving three-dimensional problems on non-stationary wave processes in condensed media
	172	On a numerical scheme for solving the Navier-Stokes equations

L. V. SHURSHALOV	179	Calculation of the explosion of a rapidly flying body
L. PLASKOTA		Short Communications
S. L. IVANOV	186	Optimal linear information in the problem of reconstructing the global maximum of a real function
A. M. KUZUYK and V. L. MAKAROV	190	A method for locating a limit saddle point
A. S. IL'INSKII and O. B. POPOV	192	The rate of convergence of a difference scheme using the sum approximation method for generalized solutions
E. F. ZHIGALKO	197	An algorithm for calculating the reflection coefficients in problems of diffraction by smooth corrugated surfaces in inhomogeneous media
YU. I. KHUDAK	200	A scheme for computing near-axisymmetric gas flow and supersonic flow past a cylinder end-face at a low angle of attack
	203	One class of solutions of a homogeneous system of Maxwell equations for an isotropic medium

VOL. 26, NO. 4

CONTENTS

1986

		Translation of Number 7
YU. M. NECHEPURENKO	1	A polynomially stable fast parallel algorithm for tridiagonal systems
YU. L. GAPONENKO	6	The problem of the stability of the solution of an integral equation of the first kind in a weak compactum
D. V. DOVNAR and K. G. PREDKO	13	Use of orthogonalization of the mappings of basis functions for regularized restoration of a signal
M. V. MIKHALEVICH	22	Estimates of the rate of convergence of a method of seeking the most preferable element
M. YA. KOVALEV and YA. M. SHAFRANSKII	30	The construction of ϵ -approximate algorithms for the optimization of functions in successively constructed sets
G. I. SHISHKIN	38	Solution of a boundary value problem for an elliptic equation with a small parameter for the leading derivatives
S. N. LEORA, S. A. NAZAROV and A. V. PROSKURA	47	Derivation of limiting equations for elliptic problems in thin domains using computers
P. N. VABISHCHEVICH	58	Numerical solution of the inverse problem of the MHD-equilibrium of a plasma
M. V. KLIBANOV	67	Uniqueness of the solution of two inverse problems for a Maxwellian system
L. B. PRIGOZHIN	74	A quasivariational inequality in the problem of filling a shape
S. K. BETYAYEV	79	Topology of two-dimensional selfsimilar motions
O. A. SHCHERBINA		Short Communications
A. S. BELOMYTSEV and V. N. KARABAN	88	A unimodular problem of integer programming
L. N. TARASENKO	91	An algorithm for solving a non-linear boundary value problem for ordinary differential equations in multivalued regions
YU. I. KHUDAK	93	Numerical solution of a problem with an oblique derivative
Vs. M. KUZNE and N. G. USHAKOV	95	An estimate of the reflection coefficient of a system of dielectric layers
YU. L. GAPONENKO	100	The problem of the numerical restoration of a wave front from the intensity distribution
		Translation of Number 8
	104	The parameter-extension method for an equation of the second kind with a Lipschitz-continuous and monotonic operator

E. O. MOVSESYAN	110 Calculation of the zeros of a quasipolynomial using the argument-derivative method
G. A. MIKHAILOV	116 Vector Monte-Carlo methods for calculating iterations of integral operator resolvents
E. A. NURMINSKII	122 A class of convex programming methods
K. A. ABUOV and V. P. CHERENIN	129 Synthesis of one-product two-stage production-transport networks
I. A. BLATOV	138 Convergence in a uniform norm of Galerkin's method for a singularly perturbed boundary value problem
S. P. KURDYUMOV, E. S. KURKINA, A. B. POTAPOV and A. A. SAMARSKII	148 Complex multidimensional structures of the combustion of a non-linear medium
A. G. DAIKOVSKII, YU. I. PORTUGALOV and A. D. RYABOV	159 A program package for designing accelerating structures
N. YU. ORLOV	165 A method of calculating selfconsistent potentials for a mixture of chemical elements
S. A. GABOV, B. B. ORAZOV and A. G. SVESHNIKOV	170 On the non-stationary theory of internal waves
S. I. SMAGIN	178 On a numerical algorithm for computing fields in laminated media
YU. I. ZHURAVLEV and A. YU. KOGAN	184 An algorithm for constructing a disjunctive normal form equivalent to the product of the left-hand sides of Nelson Boolean equations
A. F. ROOZE	Short Communications 188 An asynchronous iteration method of solving non-linear equations using parallel approximation of an inverse operator
R. E. GUT, V. V. EGOROV and V. N. IL'IN	192 A method of generating pseudorandom normal numbers
S. S. ARTEM'EV and I. O. SHKURKO	193 An algorithm of variable order and step based on methods of the Rozenbrok type
YU. A. BONDARENKO and V. N. SOFRONOV	195 The use of energy Lagrangian coordinates for a numerical solution of the one-dimensional heat conduction equation
V. V. BELIKOV	198 On a method of constructing computational meshes
V. A. GAL'BURT, M. F. IVANOV and O. A. RYABOV	201 Calculation of ionization when modelling high-temperature hydrodynamic effects
V. I. GRYN	204 On the existence and uniqueness of a solution of the energy and radiation transport equations
YU. I. MOKIN	206 Methods of solving the integral equations of potential theory

VOL. 26, NO. 5

CONTENTS

1986

	Translation of Number 9
V. A. MOROZOV and A. B. NAZIMOV	1 The necessary and sufficient conditions of regularizability of degenerate sets of linear algebraic equations using the shift method
V. I. GRYN and S. A. YAKOVLEV	7 Estimate of the accuracy of solving an ill-posed problem using averaging functions
A. K. PONOMARENKO	18 Estimate of the residue of a cubature formula for some singular integral
E. D. ALYMKULOV and N. K. LUK'YANOV	23 A method of approximately aggregating linear systems
L. D. POPOV	30 Linear correction of ill-posed convexly concave minimax problems using the maximin criterion

- O. A. SHCHERBINA 40 A modified local algorithm for solving block problems of discrete programming
- A. M. BEREZMAN, M. K. KERIMOV, S. L. SKOROKHODOV and G. A. SHADRIN 48 Calculation of the eigenvalues of Mathieu's equation with a complex parameter
- YU. I. MOKIN 56 The calculation of Green's functions for elliptic equations
- D. S. FILIPPYCHEV 61 Numerical modelling of the propagation of compensated electron beams in a bounded system
- V. N. KOTEROV, T. M. PLYSHEVSKAYA, I. N. SIDOROV and A. V. SHIPILIN 68 Calculation of the output characteristics of a continuous electro-ionization CO₂ laser using a two-dimensional mathematical model
- N. V. MIKHAILOVA, V. F. TISHKIN, N. N. TYURINA, A. P. FAVORSKII and M. YU. SHASHKOV 74 Numerical modelling of two-dimensional gas-dynamic flows on a variable-structure mesh
- Short Communications**
- A. M. GRIGORYAN 84 New algorithms for calculating discrete Fourier transforms
- V. F. APEL'TSIN, A. S. IL'INSKII and B. R. SABITOV 89 On the approximation of vector fields
- A. K. SHATOV 91 On the diffraction of acoustic waves by an inclined half-plane in a stratified liquid
- V. S. CHELYSHKOV 94 The use of the method of integration with respect to a small parameter to calculate the laminar boundary layer on a cylinder
- G. D. BABE and E. L. GUSEV 97 On the degeneracy of the necessary conditions of optimality in problems of synthesizing optical interference coatings
- V. N. SNYTNIKOV 101 A monotonic scheme of through computation based on an implicit algorithm of flux correction
- D. N. GAINANOV 104 A graph-theoretic algorithm for constructing a committee of an inconsistent system of linear inequalities
- V. N. GRYN 106 Variational principles for the transport equation and the method of spherical harmonics
- Translation of Number 10**
- S. M. ALIAKBAROV and E. M. MUKHAMADIEV 108 Investigation of the correctness of an extremal problem
- SH. I. GALIYEV 116 Obtaining an approximate solution of a maximin with connected variables and of a multiple maximin
- N. M. POPOV 125 Approximate solution of multicriterion problems with functional limitations
- S. KH. DZHUMAGAZIYEVA 135 Analysis of the properties of solutions of some non-linear equations
- I. I. KUDISH 142 Numerical methods of solving a class of non-linear integral and integro-differential equations
- N. K. MAKASHEV 155 Methods of deriving the equations of gas dynamics in the case of high-threshold reactions
- YU. N. KONDUYURIN 164 A statistical approach to the solution of the Boltzmann equation
- V. F. APEL'TSIN, A. S. IL'INSKII and B. R. SABITOV 169 Fundamentals of a modified partial projection method for problems of scattering from hydrometeors
- S. V. TROFIMOV 181 The optimal reduction of the number of equations in systems of Nelson's type
- V. V. ZADOROZHNYI 186 A method of synthesizing a correct recognition algorithm for a given control sample

S. A. DZHANGIROVA

V. I. BUSHUEV and I. K. LIFANOV

A. V. GULIN and S. I. KOVALEV

V. B. GORSKII

O. A. SHCHERBINA

V. N. OSIPOV

Short Communications

- 191 Error accumulation in solving sparse systems of linear algebraic equations with a principal diagonal
- 195 Numerical solution of singular integral equations in a class of singular functions and the problem of blowing of the flow in aerodynamics
- 200 The spectrum of a difference scheme in irregular nets
- 204 The variational principle and canonical equations of electrohydrodynamics
- 207 On local algorithms with variable neighbourhoods and indicator information
- 211 Monotonic Boolean functions and incompatible systems of inequalities
